confidence

# Transform how you do business.

Demand-driven manufacturing can be a complex business, but panic and guesswork are no longer priorities once you synchronize your processes with us. Sync**Manufacturing**™ software syncs all resources vital to your internal operations and extended supply chain — to simplify your life and transform how you do business.

---

**Only SyncManufacturing synchronizes and prioritizes your entire order-to-delivery process in real-time.**

- Create dynamic schedules.
- Synchronize shop floor workflow.
- Maximize production throughput.
- Manage supply replenishments.
- Drive on-time delivery.
- Promote continuous improvement.

“ In two years, we’ve seen a 27% reduction in cycle time, work-in-process reduction from \$32M to \$21M and a 60% reduction in the average number of days late for delivery. ”

VP, Global Business Improvement  
& Information Systems  
Metals Manufacturer

# Real-time control. Real-time results.

Sync**Manufacturing** focuses on real-time enterprise and operational management — from planning and scheduling to inventory management, production and execution systems.

“ With Synchrono, our velocity is up, our direct costs are down. Additionally, we’ve dropped work-in-process by 25%. I cannot imagine running my business without Synchrono. ”

**Director of Capital  
Manufacturing Operations**  
Capital Equipment Manufacturer

Discover how Sync**Manufacturing** can synchronize and prioritize *your* manufacturing operations and extended supply chain.

# Real-time information integration and flow throughout the plant and beyond.

In manufacturing, changes are constant and reactive measures can result in chaos. Our user-friendly software is comprehensive and adaptive, giving everyone visibility into changes in supply and demand, so you can **keep your production process synchronized** in real-time.

## Know more.

In a synchronized environment, everyone is connected so everyone knows more — from scheduling, purchasing and production to sales, engineering and management.

We eliminate the need to build and update static production schedules. As demand enters, Sync**Manufacturing**<sup>™</sup> checks materials and capacity, while managing constraints. The system easily adapts to changes in real-time, reflecting what's actually happening on the shop floor. And everyone has visibility, **so everyone is always on the same page.**

## Control variability.

Sync**Manufacturing** allows you to manage and respond to variability before it undermines production. Whenever an order is moved, the priorities of all operations and materials are automatically re-prioritized and re-synchronized.

Consume Pct	Item Nbr	Item Desc	Order Nbr	Resource Name	Net Required Qty	Total Time	Setup Type	Production Unit

## Define, refine, improve.

Our analytical tools and real-time data allow you to track, predict and improve performance of critical areas of the operation.

Recognize and resolve items disrupting flow. Further perfect your flow with every order.

Work Order Nbr	Item Nbr	Item Desc	Release Qty
10000001	10000001	1004 4' 8INCH x 4 2INCH Pine Wood	Consumes Qty: [16] Release Qty: [0]
10000002	10000002	30 (Step 3 of 4)	
10000003	10000003	40 (Step 4 of 4)	

Analytical tools allow you to monitor key pacing operations and align orders.

Easily access real-time information and modify inputs with user-friendly drag-and-drop features.

## Unique capabilities in SyncManufacturing™ software...

Build schedules dynamically, so orders are immediately queued, prioritized and communicated to all functions.

---

Adjust execution variability proactively, in real-time, and align operations with customer delivery expectations.

---

Provide universal visibility to ensure clear, consistent interpretation of data and objectives across production, supply, customer service, management and other functions.

---

Rapid replenishment and purchase functions link directly to current production capabilities in a pull-based process that supports demand-driven manufacturing.

---

Highlight opportunities for continuous improvement with analysis tools that are intuitive and easy-to-use.

---

Integrate easily with any existing ERP platform — including Infor, Oracle, SAP, Microsoft Dynamics, JD Edwards and more.

## drive concrete, competitive results.

Dynamic scheduling and execution features increase throughput as much as **50%**.

---

Resource, labor and materials synchronization eliminates waste and cuts cycle times by up to **75%**.

---

Make and buy decisions based on actual demand reduces inventories by as much as **60%**.

---

Capacity management and visibility tools make it easier to manage demand/production changes — and drive on-time deliveries as high as **90%**.

---

Access to key metrics helps you allocate resources and boost revenue-per-employee by as much as **30%**.
