

Synchrono® to Highlight Demand-Driven Manufacturing Platform at the Gartner Supply Chain Executive Summit

Synchronized platform makes the real-time visual factory a reality

ST. PAUL, Minn. -- May 13, 2014 – Synchrono®, a leader in demand-driven manufacturing software solutions, will be demonstrating its Demand-Driven Manufacturing Platform at the upcoming Gartner Supply Chain Executive Summit, May 20-22 in Phoenix, AZ.

The new [Demand-Driven Manufacturing Platform](#) enables the real-time visual factory of the future. The Synchrono Platform is an integrated solution that synchronizes workforces, methods, machines, materials and information to drive production flow, troubleshoot and take demand-driven manufacturing to new levels. The Synchrono Platform integrates third party applications along with the following Synchrono systems:

- SyncManufacturing™: Demand-driven planning, scheduling and execution software
- SyncKanban™: Pull-based inventory replenishment software for supply chain execution and collaboration
- SyncOperations™: Data collection, historian and workflow engine powered by Savigent that gathers and analyzes information from Synchrono systems as well as from machine-level and disparate enterprise systems for smart monitoring and synchronization of equipment and processes
- SyncAlert™: Real-time notification and escalation software
- SyncView™: Real-time, synchronized visual factory information system

The Demand-Driven Manufacturing Platform gathers and analyzes information from Synchrono systems as well as from both machine-level and disparate enterprise applications, displaying data in real-time, on any device. This allows for complete transparency and the ability to quickly drill-down into greater detail to manage variability and constraints while monitoring machines and work cells.

The Demand-Driven Manufacturing Platform allows manufacturers to exchange real-time data across systems and resources; use predictive data to pre-empt issues and maintenance needs; address critical issues instantly, generating alerts, escalation and action plans; ensure quality and production flow in conjunction with demand; and drive scalable and continuous improvements.

[The Gartner Supply Chain Executive Summit](#) is May 20-22 in Phoenix, AZ. For more information on the Synchrono Demand-Driven Manufacturing Platform or to arrange a private demo, please contact Pam Bednar at pbednar@synchrono.com.

About Synchrono

Synchrono® LLC is a leading provider of demand-driven manufacturing software and services that simplify complex manufacturing environments and transform business results. The company's planning, scheduling and execution and eKanban inventory replenishment systems are powerful on their own, and when combined with its operations solutions on the Synchrono Demand-Driven Manufacturing Platform, clients synchronize workforce, methods, machines, resources, data and more enabling flow from order inception through production and delivery. Aggregating information from its own applications as well as from both machine-level and disparate enterprise systems, the Synchrono Demand-Driven Manufacturing Platform provides a real-time visual information system that empowers everyone - from the top floor to the shop floor - with actionable information.

Synchrono helps clients manage constraints, improve flow, drive on-time delivery and maintain a competitive edge. Look to Synchrono for software that meets your demand. Sync with us at www.synchrono.com.
