

Demand-Driven Matters

Blogger Profiles

John Maher

John's passion for demand-driven manufacturing is equal to his interest in how this method improves the lives of employees within these environments. "I'm here to help, not to judge" comments John whose posts reflect why demand-driven matters and are based on his experience working in manufacturing environments and expertise in ERP, MRP, APS, supply chain, manufacturing planning and scheduling systems and constraints management.

Sarah Huhner

Sarah takes a customer-focused and results-driven approach to project management and demand-driven manufacturing systems implementation. With hundreds of projects under her belt, Sarah is fearless when it comes to challenging the status quo and delving into the details to ensure an optimal user experience. As such, her posts reflect tips and best practice advice for managing people and processes through projects - and getting the most out of your systems.

Pam Bednar

Big data, the Internet of Things, Industry 4.0, Factory of the Future, the Visual factory – what do you really need to pay attention to and what do these concepts mean to most manufacturers? A sceptic and trend-spotter, Pam's posts leverage a background in technology marketing to apply these big concepts to the real world – and real work – of demand-driven manufacturers.

Rick Denison - Guest Contributor

Rick is the "Dr. Who" of manufacturing operations and logistics. And while Rick doesn't travel through time, he is adept at leading change – and saving time - in a diverse range of manufacturing environments through Lean manufacturing, Six Sigma, and TOC techniques. Rick's posts address how demand-driven matters and draws from his background in process improvement, change management, project management, information systems implementation, and profitability analysis.
